DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ryu.

As per claims 1-3, Ryu teaches a signal adaptor for a USB and a PS/2 connector, comprising:

a base, having a USB adaptor (10) on one side and a PS/2 adaptor (12) on another side thereof, wherein the base is connected to one end of a transmission wire (13), and wherein another end of the transmission wire (15) can be connected to signal input device and a connector configured for connecting to a USB adaptor can be connected to the USB adaptor of the base or a connector configured for connecting to a PS/2 adaptor can be connected to the PS/2 adaptor of the base. (Ryu, Abstract, Figure)

Art Unit: 2182

As per claim 4-7, Ryu does not teach wherein said signal input device is a mouse, keyboard, joystick, or wireless receiver. Nonetheless, it would have been obvious to one of ordinary skill at the time the invention was made that Ryu's signal adapter would be connected to a plurality of devices and not depart from the inventive concept. Furthermore, a mouse, keyboard, joystick, or wireless receiver are all well known signal devices in the art, thereby making use of these well known signal devices obvious to one of ordinary skill.
